

Bollards M30/M50

Fixed perimeter security
with pedestrian access

Permit free movement of pedestrian
traffic, while protecting from accidental
and malicious threats.

Features:

Choice:

Architects and designers have options including a variety of finishes, lighting designs, and foundations

Clearance:

Shallow mount bollards when working around buried utilities, deep mount bollards for the smallest footprint

Freedom:

Removable bollards allow occasional vehicle traffic without sacrificing security.

Security:

Fixed bollards protect buildings and equipment while adding to the overall aesthetic of the facility.

Made in USA:

Designed for frictionless operation and easy service access

Fixed Bollards

High Security Anti-Ram

Technical Specifications
